- Roma interested in connecting with industry professionals via LinkedIn [17:26](#)
- Update LinkedIn banner with professional image and consider adding motivational statement [39:33](#)
- When interviewed, employers want to understand candidate's personality and interests outside workplace [44:44](#)
- LinkedIn offers volunteering category to highlight organizational contributions [45:14](#)

- Expand LinkedIn skills to 50-70 to increase recruiter search visibility [46:25](#)
- LinkedIn displays only top three skills, so strategically order them [47:35](#)

Professional Achievements

- Roma highlights major career achievement: Led project generating \$40 million revenue from two sites [28:36](#)
- Need to identify technical and soft skills that demonstrate Roma's professional competencies [30:20](#)
- Roma lacks budgeting experience and seeks complementary skills through courses [56:21](#)

Recruitment Support

- Kaleem offers potential recruitment assistance if matching opportunities arise [52:25](#)

Full Transcript:

[00:03](#) Roma Kay: Okay.

[00:05](#) Kaleem Chaudry: a summary of the, the notes straight after the callers, end it, so be good as a reference, you can view back any of the questions, then I'm gonna ask in this session so you don't have to I'm gonna also send you an email, by the way on top of that, right? So there's some specific questions. I

[00:25](#) Roma Kay: Yeah.

[00:26](#) Kaleem Chaudry: want to ask about your experience about your role. So just as a kind of intro that's what happened, really happy that we're working together, so I'm really excited to help you get that CV updated and hopefully you

[00:39](#) Roma Kay: Well.

[00:42](#) Kaleem Chaudry: can achieve what you're looking to get out of that. In terms of, you know, securing another role. To meet your career aspirations and so forth. What we're going to cover today is I need I I don't have an existing CV that I'm going by. I've only got your LinkedIn information. Do you have? Do you have it like When was a like a

[01:03](#) Roma Kay: oh,

[01:04](#) Kaleem Chaudry: version that I can also use as a to get some inputs from maybe from some of the older roles?

[01:12](#) Roma Kay: Yeah, I can, I can email it to you as we're talking actually but I mean, I think it's really the same but yeah, I mean, I'll do it, right?

[01:16](#) Kaleem Chaudry: Don't worry. The objective of the exercise right now is to get as much information from you as possible or rather, we, we have more information. And then the less. And if, you know

[01:36](#) Roma Kay: so,

[01:36](#) Kaleem Chaudry: your older CV As just as an FY, you can send it to me when I send you guys send you the email, you can reply to the question. Then you can include that. If you think it's relevant, if you don't

[01:44](#) Roma Kay: Okay.

[01:45](#) Kaleem Chaudry: think it's relevant and that's up to you. Because ultimately what I do is basically use as much source information as possible to compile that first ATS compliant

[01:53](#) Roma Kay: Absolutely.

[01:57](#) Kaleem Chaudry: Which will be your standard two page CV. and what we're what we're trying to do is Get released five bullets for your last you know, the last two three responsibilities and making them impactful and then we'll just go

[02:13](#) Roma Kay: Okay.

[02:15](#) Kaleem Chaudry: through your kind of career history because when when employers are looking at the career you know your recent experience and looking at the last 15 years or so. And then obviously we're going to list everything, but we don't have to go into greater detail as we go along. And then, what's on what that? Fun, you know, information for what, what effectively is the foundation, then it's easier for to go ahead and create the graphical version and then update your LinkedIn as well, right? And then your LinkedIn is going to be updated in a way that's not a copy paste of your CV, it's gonna be. It

[02:48](#) Roma Kay: Gotcha.

[02:48](#) Kaleem Chaudry: brings a certain things to life, right? So that, you know, when you

[02:52](#) Roma Kay: Gotcha.

[02:53](#) Kaleem Chaudry: your CV, first thing people do, they do a Google search. And look at who you are on LinkedIn because they want a quick snapshot because sometimes a CV is a bit more difficult to find the details. And so you want to make sure that you're LinkedIn is in sync with your CV, but you're LinkedIn is a bit more. Eye catching then just looking at a You know a two-page document which is the CV or the resume. Okay.

[03:15](#) Roma Kay: Okay.

[03:17](#) Kaleem Chaudry: excellent. So hopefully that kind of just sets the the backdrop and we'll probably you know use the full hour. so, What? I want to basically capture, you know, you've been working in one company for a considerable period of time and you know, you've obviously taken the step to review your current situation and what you want to do next, what are your career goals over the next one to three years? Because what that Allows me to do. Is to capture. What we want to portray on the CV? What do we want coming coming out? You know, is it basically using your current skills? and to land another role which could be a very specific or because my second question would be Are you targeting any specific industries or specific job titles or job roles? Are you open to industry? There may be some relatable industries that you're

also open to increase your chances. So just in terms of and as I say You don't I'm not putting you on the spot now, You may want to think about this, I'll send you the email but just to give me a favor. And just so that, you know, what we would, you know, what kind of information you need to come back with. But because when I send the email across to you, you can just kind of like in red text reply to each of the each of the questions of

[04:39](#) Roma Kay: Okay.

[04:39](#) Kaleem Chaudry: your course. So you don't need to kind of write out as fresh but just a high level. What are your kind of create goals over the next one to three years?

[04:49](#) Roma Kay: Well. Mine, one of the reasons for the changes, I'm feeling stagnant in my current position and there has been to work with mine manager about a little bit of a change from a responsibility perspective. But I haven't seen that. Like we've been talking about it for the past now, going on four months. And nothing has happened. So I want to explore based on my experience around a program management aspect of it, right? I do I started it inside sales, moved on to business development and then moved on to sales operations, sales operations has a very different meaning in our company. And what I see in the in the industry not just in specifically to distribution or it or tech in general right across everything is people perceive those operations to be very, you've got sales goals, you're going out meeting targets, etc. And that's not what to a large degree I do today. I manage a lot of the backend processes, a lot of the movement of, you know, in a big organization movement of court requires supporting a customer, providing them and overview of how we're set up. How do we transact? How we do business internationally, understanding the complexity of exporting ports. Etc, is where I've, that's kind of what my role is today in this company. And I feel that's a lot of knowledge. There is this aspect of it. Even if I talk to people within the organization, It's always that. Hey I thanks. I'm glad we've got you. I'm glad you can get on a call with the customer and talk to them about it. So I think that's a that's a strength of mine I have I was in a sales role. So you know, doing going back into Salesforce, they would not be an issue but I'm looking for a bit more senior obviously from continuing because I'm a senior directly here. So I'd like to continue with that, right from from a salary expectation. From a leadership perspective, I manage a team of about five people today. They're all remote. So I have that experience as well. To really is to see if can I take that skill set that I have here in this organization? And and drive it into another one, right? Be able to support because it's not while it's industry specific but it's it's not, it's just around processes, it's around program management, it's around. How do you transact that could be across any any company in any industry in my mind?

[07:31](#) Kaleem Chaudry: You know, that's very good, right? Because you you've explained it. Quite well, that you possess a lot of transferable skills. and they're not, it's not like your especially list in terms of like you can only do sales and use it even even as you described because people can look at your profile and look at, you know, say global sales operations as a very, as a title and then Unfortunately people do this, right? They they put you in a box, right? They put you in a box and they think that that's exactly, you know she's head of sales and what whatever definition of cells. They view it as. But as we, as we know, every company is different. Every company has got its own The way it's organically grown and then over time certain responsibilities, you know, you accumulated just just from my clarification. So when the do you guys have like a pre-sales function, do they go out and engage with a client and then support that they need to continue?

[08:33](#) Roma Kay: So, that's Yeah yeah. So I'm like A and I'm like an SME within our company around. Hey, how do you transact international? A so sales goes in, they do a lot of the cold calling warm calling. We've not and you know, just talking about, you know, Joe blocks on the street. These are Fortune 500 companies. So a lot of the hyperscalers, the mtdcs that we transact with. So the sales team is based in the

[08:57](#) Kaleem Chaudry: Yeah.

[09:00](#) Roma Kay: the US, We've got sales teams across the world and while certainly accounts the,

[09:04](#) Kaleem Chaudry: All right.

[09:06](#) Roma Kay: the communicate in collaborate themselves without leveraging support from me, but there are instances very I just recently completed a couple of projects for a US-based customer that needed products internationally. and we facilitated that from, you know, Just the from talking to the customer giving them an overview of how we would support it understanding their needs, obviously, as part of that overview. And then bringing back, you know, leveraging our regional teams to come in and support them from product pricing, you know, account on boarding fulfillment of the orders in Seeing and, literally, all these support that the customer needed around tracking orders, etc, is where can help them kind of drive it into the regions. And then once the customer had the, Had had support from the regional teams, that kind of did a handoff. And then I was still part of the communication and ensuring that they got what they needed. You know, I'm huge on. Hey acknowledging and and understanding what the customers asking and giving them a timeline open to respond. So a bit of that customer service aspect as well. That is very, very critical. I mean, you know, A constantly been a customer, has to come back twice to ask for the same

[10:23](#) Kaleem Chaudry: Yeah.

[10:24](#) Roma Kay: information. so,

[10:27](#) Kaleem Chaudry: Okay. Now that's that's great. I think. this is going to be very useful exercise because not only am I seeing That we want to demonstrate within the responsibility that you have performed. What are the different skills but also describe what those responsibilities are? And like for example at the top of the CV, I'll have not just you know what one you know one job title I'll have like three or four different areas that you are because you know you mentioned looking at program management roles, you know, that's very different from

[11:05](#) Roma Kay: Yeah.

[11:06](#) Kaleem Chaudry: cell's you know, manager role right in, you know, like from a traditional recruitment perspective and and this is like, you know, a recruitment company. But I come from the industry and I know exactly, you know, unfortunately, you know not to discriminate against anyone but a lot of People working recruitment companies have just kind of, you know, come out of just the early early 20s.

[11:31](#) Roma Kay: Oh yeah.

[11:32](#) Kaleem Chaudry: never really work today in the industry but they're just reading things from a job spec and they're just literally putting you in a box and and then not really considering

[11:38](#) Roma Kay: Yeah, exactly.

[11:41](#) Kaleem Chaudry: that you actually are actually, you know, you are open to To other other roles, because I think

[11:48](#) Roma Kay: Yeah.

[11:48](#) Kaleem Chaudry: when it comes Andrew is being a little bit creative because companies Companies. Actually you know are very I'm gravitated towards just they want to they want to know what skills do you have? And how have you

[12:02](#) Roma Kay: Exactly.

[12:03](#) Kaleem Chaudry: demonstrated those skills in the in the roles that you have performed, right? The same unfortunately is an

[12:07](#) Roma Kay: What?

[12:10](#) Kaleem Chaudry: out of date document. It's a 20 30 40 year document which doesn't really

[12:14](#) Roma Kay: Yeah.

[12:16](#) Kaleem Chaudry: serve it purpose anymore. Unfortunately it's like an it's like a passport. You have to carry you know when you're traveling between.

[12:23](#) Roma Kay: Well.

[12:23](#) Kaleem Chaudry: countries, will that information is available digitally? Right? You can have a passport on your phone, right? So the CV from an admin perspective, it's a really there. you an interview and then once you learn to the interview, then it's down to yourself to be able to, you know, you've got a full opportunity to describe your, you know. But

[12:40](#) Roma Kay: Yeah.

[12:41](#) Kaleem Chaudry: fortunately, you are competing against thousands of people on LinkedIn or wherever. And what we want to do is make sure that we highlight certain areas of your CD and your LinkedIn profile that you're increasing your chances of getting noticed, right? And also differentiating yourself from the next person because and

[13:02](#) Roma Kay: Exactly.

[13:03](#) Kaleem Chaudry: Statistics are they an average CV gets reviewed for like seven seconds. Right so what we you know, which is really It's tragic, right? But that's a as

[13:12](#) Roma Kay: Is our?

[13:14](#) Kaleem Chaudry: unfortunately what the what the data tells us, right? So what we want is

[13:18](#) Roma Kay: Yep.

[13:18](#) Kaleem Chaudry: basically highlight, you know, we want We want the attention. And and unfortunately, we're now living in a day and age, you know, everybody tiktoks and instagram, this the attention economy, right? Everyone is

[13:27](#) Roma Kay: Uncle.

[13:30](#) Kaleem Chaudry: got, you know, shortension spans and so they want to be able to see information very quickly. Scan scan. Oh, there you go. Yeah. This person looks like, you know,

put them on the short list. That's the fact only, then we can get that. Then our job is done, right, then we've achieved our goal. So You mentioned already about. The industries, right? So you're your skills are transferable enough. So basically apply so you're not you're not pigeon holds right in the industry that you currently, right? And you've got exposures, you say

[14:00](#) Roma Kay: Yeah.

[14:01](#) Kaleem Chaudry: you've supporting the needs of other Fortune 500 companies so there's that aspect as well. Okay, what is your unique value proposition? Or what do you? What do you want to be known for professionally or if I say this in another way? What do people who work with you? Your colleagues, your peers, you know, managers X managers. What do they know about you? Or what do they say about you? That makes you different from the next person?

[14:41](#) Roma Kay: Go gather in that regards, right? If I if I get an escalation I get the things done as simple as that, right? It's a come to her, she's got the knowledge. She knows who to call who to leverage to get a solution. That's really what is. And also you know, when we when I speak to customers about our About the company and our presence and our support etc. The customers are always Blown away by the amount of, you know, obviously the scope of the and the breath of the company and also the the teams that are available for them to leverage. They don't have a lot of the local knowledge in that regards, but when we bring in, you know, when they come to us, we're able to support. and and give them clarity there, which Sales and customers both appreciate it. So, a lot of obviously, over the years being with the company for that long, I know who I can call in to get things done. Right. Critical thinker trying to always anticipate. That you know, five steps in front as opposed to your case, all one and then go to the next go to the next. So if I give you an example right from me, hey, there's going to be this really critical project that we're going to be working on. All the way to the end is getting all the key players together ahead of time so they understand. Okay, you're going to be your, there's a scope of yours is gonna come into play but Gonna be rightful way. It's going to be, you know, Full transactions down or something, but they're aware of it. So that now you're

[16:16](#) Kaleem Chaudry: Yeah.

[16:16](#) Roma Kay: not hitting them at all. My overlook is become your emergency. So very, you

[16:20](#) Kaleem Chaudry: Yeah.

[16:21](#) Roma Kay: you know, conscious of time, obviously that's that's very important and Again, because of the hours etc that I work is, you know, time they always appreciate that. Hey, you know, you can you jump on a call, early mornings date nights without any complaints? I mean, let's just go. This is the part of what I do and the regions only support, but definitely gets appreciated a lot more.

[16:40](#) Kaleem Chaudry: Sure. Excellent. Okay. Now that's that's kind of gives me. A good perspective. Also what type of I know you're you know, your your goal is obviously to look at scoring new opportunities. Are there any other? Other Are there any other opportunities that you are looking to maybe attract through using your CEO and mainly on LinkedIn? Like

[17:13](#) Roma Kay: Yeah.

[17:14](#) Kaleem Chaudry: obviously, job offices one, but like speaking engagements or from a networking perspective or connecting with other Industry professionals. Is that?

[17:23](#) Roma Kay: Obviously.

[17:24](#) Kaleem Chaudry: Yeah.

[17:26](#) Roma Kay: Absolutely. I mean not speaking engagements because I'll be very honest with the clean. I have Bell's palsy so I'm very conscious of Of my my face in, you know, my smile etc, but definitely connecting with other

[17:39](#) Kaleem Chaudry: that's,

[17:41](#) Roma Kay: industry professionals. I've not had an opportunity as much. While I've been told hey, you know, if there is a A specific seminar that's going on and if you'd like to attend it, there isn't anything that is specific around what I do anyway. So it becomes very challenging to go out and find and connect with like-minded individuals. Definitely women in it. You know, we have a group within our organization as

[18:06](#) Kaleem Chaudry: Yeah.

[18:07](#) Roma Kay: that I am part of the, the women's, yeah, our women impact network, but even with that being home, be not home base, I go into the office when on YouTube, but being kind of in a A lot of what I see from. Industry events, etc. Their primarily in the US, right? So that's kind of where I find. I don't need to be physically there, but just be able to connect with folks. Like that would have been would be nice. I do try that in internally within my organization, you know, with some of the key of players that are More prevalent in the industry. But again, do I do a lot of it. Unfortunately

[18:49](#) Kaleem Chaudry: Yeah.

[18:51](#) Roma Kay: not it's just I always walked under

[18:55](#) Kaleem Chaudry: And do you have you have you used your LinkedIn to connect with other, or do you have you joined any groups LinkedIn? So, you haven't been really active on LinkedIn from that side.

[19:03](#) Roma Kay: not much, you know, candidly

[19:04](#) Kaleem Chaudry: side. Okay. Which which, you know, hopefully, this this process will then give you the confidence. You know, once you have Once you have a fresh profile, right? It kind of gives you an extra pair of wings, right? Not to quote a famous, right? But it does, right? Like I'll give you an example with myself. I never, you know, I, I created a LinkedIn account in 2006. I then probably updated it in 2010. When I moved Companies, I then updated again in 2013, when I moved countries. And then probably five years later, updated again, when I got promoted in my company, right? So then that was my kind of LinkedIn updates, never really interacted with anyone. Never liked a post. I've actually been very bad at social media in that regard anyway, right. But they come 2021, I left the corporate world and for me it was a bit of A You know, it was a bit of an interesting chapter last adding, what? 25 years in the industry. And you know, I was toying with maybe I want to, I didn't want to jump back into another company but I was playing with consultancy and things like that. And then I started connecting. I got involved with the Web 3 Blockchain community and through LinkedIn. And I have freshened up my LinkedIn profile. and I had 12 1100 connections, two years ago, November 2022, I had 11 and under connection and that is through my You know, through the people that I've worked with over the years network with and so forth. And now, two years on I've now got like, 13,000 13 and a half thousand followers, right? And that's purely because of me Connecting with like-minded individuals. Sharing, you know, knowledge expertise. Going on to webinars like attending a 30

minute webinar and then messaging somebody afterwards and then that person as connected with somebody else or ask a specific question and it's quite fascinating. But people then the more you use LinkedIn, if you've got a fresh profile people can kind of straight away, see what you are, what you represent, and what you may have to walk. And it doesn't have to be like LinkedIn is, is yours. It's not your companies, right? It's your personal brand but it can

[21:32](#) Roma Kay: He?

[21:34](#) Kaleem Chaudry: actually Surprisingly land you, your next opportunity. Right? So that's that's

[21:39](#) Roma Kay: Yeah.

[21:41](#) Kaleem Chaudry: really what we want to try and again I mean and obviously when you land your next or you get a referral or someone because 80% of the roles are through referrals, right? Or through people, you asked someone's moved on, you know, you reach out to them on LinkedIn and then they may say quickly, Right? Send me your CV and half the time. If you see he's not updated and you don't feel like you know, like you you're just ignore the

[22:01](#) Roma Kay: Okay.

[22:03](#) Kaleem Chaudry: good, all the opportunity, right? So what we want to kind of turn that around Um, perfect. Okay. So that kind of covers the, the kind of the background, what your professional goals are. So in terms of The next part is around gathering the actual information, right? And as I say this one, you can kind of go away. Look at it in a bit more detail. Look at your past appraisals, for example, with your managers, because that's all. But obviously, when I advise a clients, there's a lower rich information because, you know, once a year twice a year, you are sitting down in a, you know, in a proper, you know, using a proper process and you are having to

[22:45](#) Roma Kay: Oh yeah.

[22:46](#) Kaleem Chaudry: describe what you have done over the last year. So often some of your main achievements are kind of covered in those so you can just copy and paste that and include it, right? So there's a lot of rich pickings and But what I will need you to do is to walk me through each role and you can just kind of describe in a one or two line on the email. You don't have to do. Now what what, you know, what were your main response? What does a typical day look like, what are your top, three to five key responsibilities in in that role? What were your biggest achievements or successes? and they know example of projects completed or revenue generated processes improved clients you know, one and, and then obviously backed up were by, were there any specific metrics that you can share like, in terms of percentages KPIs, you know, ROI anything, because effectively When someone is scanning through your CV, what they really looking at is they're looking at your job, kind of, kind of area that you've been operating in. And they're quickly. Look at the companies that you worked at and what were you doing? At those companies they want to be looking for. Very action orientated verbs. Like you know you directed you spare-headed you managed you led because I want to try and differentiate where you just part of the team, where you just assisting, where you just you know one of six individuals who actually delivered on that project goal or was you the

[24:20](#) Roma Kay: The.

[24:22](#) Kaleem Chaudry: focal individual and and then the evidence you know they want striking out. Okay. This person has demonstrated value in these roles and it's evidenced by that. Are there going to be able to do that for us? And then so you know, if your CV gets an interview, then you're able to describe that in the interview in a way you can back that up, right? So that's why this gonna

[24:45](#) Roma Kay: Go.

[24:46](#) Kaleem Chaudry: be. Because if actually, this will help us create that impact driven, measurable statements for the CD,

[24:53](#) Roma Kay: Yeah.

[24:53](#) Kaleem Chaudry: And then so is that, is that fine? You you're comfortable with, I know you've got on your LinkedIn. Essence of The you know you per very Rob. I don't know how up to date. That is so

[25:06](#) Roma Kay: Well, I've been in this role since 2016 now.

[25:10](#) Kaleem Chaudry: Right.

[25:11](#) Roma Kay: Right. Yeah and then I've been with the same company for what's going on 27 years so that's why I'm not sure. You know, I can tell you I started in 1998 as

[25:17](#) Kaleem Chaudry: Yeah.

[25:22](#) Roma Kay: an inside sales in Dubai than when I immigrated to Canada, I up on the door, got a job again. I was out of kind of literally for about four months between my time of moving and getting getting suckled here and was able to go back and

[25:36](#) Kaleem Chaudry: Yeah.

[25:37](#) Roma Kay: work with the same company. So I can put that on the, on the dock and that you sent to me, but literally, that's what my thing is that being with the same. Company for that long in. I can give you my kind of my history there, but

[25:55](#) Kaleem Chaudry: Yeah, what I would do is what I

[25:55](#) Roma Kay: I think that.

[25:57](#) Kaleem Chaudry: do is like the way you've got it on. On the LinkedIn. We can we can use similar like the titles because what we want to what

[26:05](#) Roma Kay: He?

[26:07](#) Kaleem Chaudry: we would like to do here, is what's the story? What's your story, right? Because that's another style that I've noticed on LinkedIn that works. Well, if you if you can basically on LinkedIn we can do that. But then we can use that as the structure for the CV. So, you know, you've had a number of roles. You haven't been doing the same thing for 25 years, right? And also there's a story there, right? You know, you started off You know, like in sales and then, you know, you work for a company that got taken over as well. Right. I don't know. When did that taking the

[26:43](#) Roma Kay: Yeah.

[26:44](#) Kaleem Chaudry: happen?

[26:46](#) Roma Kay: 20 out 2019. We got bought over by monster. Yeah.

[26:49](#) Kaleem Chaudry: Turn it right. Right. So you know even then in the last you know five six years as well, I'm sure it is culture change. There's, you know, there's been, you

[26:58](#) Roma Kay: Tony.

[26:58](#) Kaleem Chaudry: know, right? So you can kind of, you know and how you kind of how you survived that, you know, you were able to, in fact, not only survive by you over to thrive in the new opportunities that that kind of presented itself.

[27:11](#) Roma Kay: Okay.

[27:13](#) Kaleem Chaudry: But like, even like the thought the roles that you had within when there was the previous title of the company, you know, it shows progression, right? You know, you are

[27:20](#) Roma Kay: Yeah.

[27:20](#) Kaleem Chaudry: like a sales support. A supervisor to the global role responsibility to

[27:26](#) Roma Kay: Yeah.

[27:26](#) Kaleem Chaudry: then becoming a manager and a director. So if we can show that and and what did you do in each of those roles that you know, like Not so much detail. I need for anything that's past 15 years but at least your last three, your current role And your say, the the last two roles or the after the current role, I'll probably be putting five, but it points five. But it points, four bullet points and then it'll probably be just a quick summary on the other ones. That's the key. He aspect we want to kind of highlight progression. We want to highlight that this is, you know, there's a reason why you stayed for that long because You are, you are learning, you will continuously growing. You weren't someone who is doing a dead end job for like 30 years, right? Because there are a lot of

[28:18](#) Roma Kay: Yeah.

[28:18](#) Kaleem Chaudry: people like that. Unfortunately, you know, and there's nothing wrong with that they just were happy doing you know a role, they're comfortable with that. and then, you know that that's

[28:27](#) Roma Kay: Okay.

[28:29](#) Kaleem Chaudry: basically what they were getting rewarded for. So I I feel we can play around with that. That's not an issue.

[28:36](#) Roma Kay: all right, I mean, the biggest one for me, which caused, you know, got me the promotion, Obviously, fraud was from the Director of Business Development, where And I will put it on it is I booked I led a project that the revenue from just two of the sites was 40 million dollars and I managed those projects. Myself.

[29:00](#) Kaleem Chaudry: Yeah. So we definitely and and what just as a heads up so, Those kind of achievements. I will bake into the responsibilities so not only will you say well you responsible for those two main projects or if there are done at different times and what and what the he achievement more project was but then on the graphical CV which we are one pager which is used for, you know, Personal networking and even if you have to say, someone gives you a referral or a recruiter basically asks you to send in your CV. M Often, you know, recruiters I find

are quite lazy. They they just want to either scan the LinkedIn but you can send in the graphical version as well as your detailed version, because then you

[29:45](#) Roma Kay: Yeah. Okay.

[29:46](#) Kaleem Chaudry: quickly scan for one and then on the graphical one, I will have your very achievements on one side. So these are your top eight.

[29:52](#) Roma Kay: Okay.

[29:55](#) Kaleem Chaudry: Career achievements and so that one can scan say, Oh well, you know, this person the size of responsibility that they had at any given one, you know, as you know that they have, you know, they're not just someone who was just facing doing the line role, right. They actually did lead something, they achieved a lot of impactful delivery so we can definitely depict that in the right way. Okay, so The next section. I need for you to think about is skills and competencies, right? So, obviously, in your role, you know, there's going to be And and you've definitely described to me that there's some technical aspects and, you know, you know, the company. So what are those technical competencies? Right? You know, for someone who's worked in your field in your In your domain. What are those hard skills? Those technical skills of this is and obviously, this once again, you've been in the company for for a while, your soft skills. So clearly it's a combination of those two. That have allowed you to survive this long in this company and actually perform very well. So, you know, obviously on the Under Hard Skills, technical competencies anything, that's specific to the industry. Obviously, the clients that you have supported that they valued that, because they seem to have got the answers that they were looking for. And, and you're able to support them in that in the right way on the soft skills, you know, from a leadership communication, you mentioned problem solving at the start of the call as well. And, you know, that's that's what. Future managers and hiring. Iron managers decision makers are looking for, right? They're looking for problem. Solvers, they're looking for how can you, you know, what skills can you bring to the to the, to the to the role and apply them in our collaborative manner? You're not going to be a problem. You're not going to be, you know, someone who's setting their ways, you know, you know how to kind of get the job done using, what you have? And what has been critical to the success in your role. So, have a look back thinking because sometimes, this is, this is quite hard, right? Unless, you know, someone does a kind of independent appraisal of you or You do a proper self-assessment sometimes, you know, it's often worth asking the third person. What do you think? I'm good at right? And What do you think? I'm not so good at, right? So then, at least we can kind of highlight because I will be just to give you as a heads up, They're probably about 25. Different things that I'll be listing. I don't want you to list the 25 but just help me so that I know which area that I need to kind of go in. And then I'm actually going to be doing a full Analysis of your LinkedIn profile, this conversation because it's all recorded. I've got the transcript. and and also what you're looking to achieve because the other thing on the skills and competencies is If there are certain skills that You don't have right now, they're not fully developed. Let's say, you know, you want to go into program management, right? You clearly been doing those things, otherwise, you won't be saying that you want to kind of go in that area. But there may be something specific that we can add that will attract the attention or someone who's looking for a program manager in that particular field. So yeah, I think about what kind of skills that you want to just just list and then also Yeah which isn't my last point. Are there any specific skills you want to emphasize for your next role? so, if you do want to highlight yes, more specifically around the program management aspects, Because then, we can add in a few related to that. As opposed to if you don't have then

it's all more sales based and you could pay people might kind of tend to lean towards oh no. She would be more, you know, fit for those typical sales roles, right? Which you know, you've got a lot

[33:54](#) Roma Kay: Yeah.

[33:55](#) Kaleem Chaudry: to offer than that.

[33:57](#) Roma Kay: Okay. Unfortunately, I don't have any on the technical side from a product specific, right? I know enough to recognize what it is but to build any kind of Kind of do a design at all. Unfortunately I'm not I'm not technical at all in that regards and we have, you know, technical teams within the organization that managed that aspect of it. but, Let me think about that. But I mean again some of choose like

[34:24](#) Kaleem Chaudry: And technical may not specifically be system related, right? It could be like, like, for example, the cell strategy, or the cells workflow, right, you

[34:37](#) Roma Kay: Mm-hmm.

[34:39](#) Kaleem Chaudry: that is there could be technical aspects to that, right, which are industry specific. So maybe another way of looking at it is and the soft skills are easy to separate. You know, they are your communication, teamwork problem solving and it's all

[34:57](#) Roma Kay: Yeah.

[34:57](#) Kaleem Chaudry: critical thinking you've already mentioned some of those, right? Is anything like, you know, black project management is A is a technical skill, right? It has to be learned, right? Anything that is industry specific. You can also count that as a technical skill. so have a look at it with that kind of lens, which may help you suggest a few things because what it is it's

[35:24](#) Roma Kay: Okay.

[35:25](#) Kaleem Chaudry: mainly about technical competencies that you need, right? It can some, you know, can somebody, you know, come along Who has say, not been in your industry. But do your role without the knowledge that you have acquired over the years, right? If there would be,

[35:44](#) Roma Kay: Okay.

[35:44](#) Kaleem Chaudry: if they would struggle. Then, you know, you've got some technical competencies that that person doesn't have.

[35:50](#) Roma Kay: Yeah. Make sense, okay?

[35:54](#) Kaleem Chaudry: Okay, cool. On the Education and certificates. Which will be straightforward. The Bachelors.

[36:09](#) Roma Kay: Yeah, just don't end it.

[36:10](#) Kaleem Chaudry: and then, On the okay licenses and certificates, right? So this is a, what we're looking for, at least four or five examples of either internal trainings you've done or Internal trainings that have been hosted by an external provider. What I'm really looking for is what that certification was or that training who the provider was, if it can be someone who's recognizable will be useful. And then what year,

[36:40](#) Roma Kay: Okay.

[36:43](#) Kaleem Chaudry: completed them, if it's obviously, the more recent, the better like last five years and if you don't have Let's say an example. I mean I'm sure internally you go you get encouraged to go and trainings and You might have done some over the last years, but if there are some, let's say you are currently pursuing or you planning to pursue. We can also list that as well, right? Because it when it demonstrates is that something, you know, you're someone who's continuously looking to improve looking to invest in your own but the fact that, you know, we're just going through this exercise demonstrate, we're looking to, you know, in your career. So you know, if

[37:20](#) Roma Kay: But don't come.

[37:23](#) Kaleem Chaudry: know, if, you know, I've got an example of, you know, one of the guys I'm working with, at the moment, they've got things like So that for example they've got the project management qualification from you know many years that they did it. But in the last two years they've learned generative AI for project managers, they they somebody's training they've got from LinkedIn, Some are from you know, free webinars that they've attended communication skills certified, Professional Coach program, right? So there's a variety of things like expected target completion, April, 2025. Expected completions. Okay, so you

[38:02](#) Roma Kay: Okay.

[38:03](#) Kaleem Chaudry: could even if you're thinking about signing up but you have an kind of

[38:06](#) Roma Kay: Yeah.

[38:07](#) Kaleem Chaudry: still add that because they

[38:09](#) Roma Kay: Okay.

[38:09](#) Kaleem Chaudry: demonstrates that you are going to be doing that, right? Yeah. And I'm not looking for like a list of twenties just about four or five. And so, you know, if there's chewing progress or one in progress for actual ones that are related and also have a thing. Related to what you want to do going forward. Yeah, you know if you want and you know if you want to highlight that you are you know, your sales aspects. And there is a good sales, you know, related course. You feel you're an ad on the profile. And you think it's going to be relevant. That's fine. If you want

[38:44](#) Roma Kay: Okay.

[38:45](#) Kaleem Chaudry: it, you know from to highlight some of your transferable skills. Then you can also you know, you can think about something related to that aspect. Okay, so that kind of completes and we we spent through that quite quickly actually, but I've got a few other questions. Like you can just think ahead on on the LinkedIn side of things because they kind of do go hand in hand as I mentioned. So that's all. That's that's what I'm gonna need from us on the CV perspective and I'll send you that

[39:19](#) Roma Kay: Okay.

[39:19](#) Kaleem Chaudry: from early in. You know, linkedini is is okay for me to work on one side, got the

[39:28](#) Roma Kay: The resume.

[39:29](#) Kaleem Chaudry: About this, all these other imports. But just for something for you to kind of think ahead. Like, you know, in terms of the banner, you know, what I would suggest is replace Anna with your

[39:38](#) Roma Kay: Yeah.

[39:39](#) Kaleem Chaudry: professional banner, right? And if there's anything that you want to kind of, Portray you as an individual. You know what kind of you know, like some people motivational quotes, some people put like a statements like And we can use that in combination with your headline. So just something to think about. We're going to work on it straight away, but it's just something for you to think about and even like, your Your picture, we can kind of use what we have, but I'll clear the background. I'll resize it. Just so that, you know, 80% of it, it's your face and, you know, from the neck. Even like color schemes as well. Like, you know, the banner and, you know, tech and those kind of industries, they like dark blues and blacks, media and creativity industries are around, you know, oranges and purples and then sustainability energy there around kind of green. And so, just have a think about what kind of color schemes. You're gonna be looking for the banner because I'm gonna design it in a customized manner. And even

[40:46](#) Roma Kay: Yeah.

[40:46](#) Kaleem Chaudry: your graphical CV you can, you can just that as well.

[40:50](#) Roma Kay: Okay.

[40:52](#) Kaleem Chaudry: And then if there's anything like, you know engaging you want to put as part of your headline. like for example, there's one client I've got she's a She's the she's not 25 years experience in the pharmaceutical industry, marketing, marketing background. And she but she's also heavily to women empowerment. And so she's put that on our profile where I like you know she's what her title is but she's also passionate about women and empowerment and so we've kind of put that within the title as well of the headline statement. So there's anything that you are you know passion or you want to kind of attract that kind of From a networking perspective, that kind of group. Then we can also think about any ideas around. Your online LinkedIn. You're about statement. Which you've done actually quite a good job in terms of utilize, at least. A lot of the space that's available because there's two thousand characters and a lot of people, they just kind of men, pull one paragraph. I'll obviously review that and look to rewrite it. But the About section unlike a profile which on the CV will just be a summary of your 25, 26 year, create History the About section. We'll do a combination of Who you are, what you're currently, what you're currently, you know, responsible for what I've been your prayer, you know, highlights and then. What are you look? You know What? Are you kind of looking for going forward? I know we'll, we'll be sensitive. We're not gonna be basically broadcasting to the world

[42:33](#) Roma Kay: Okay.

[42:33](#) Kaleem Chaudry: that you. Are you looking by the same time? You know, you've got people who are in the current jobs and they Let anyone is allowed to. Be open to people, you know,

[42:46](#) Roma Kay: Yeah.

[42:46](#) Kaleem Chaudry: approaching right? So we have to make sure. We want to be able to depict the amount of section so that someone can basically approach, you know, like you looking for looking for a challenging or whatever. We don't have to use those words but we can

[43:01](#) Roma Kay: Actually present.

[43:02](#) Kaleem Chaudry: play in the missing that your excite, you know? Yeah, exactly. You you love exciting projects, right? You know, you like basically, these are the kind of things that you like, so if

[43:13](#) Roma Kay: Yeah.

[43:13](#) Kaleem Chaudry: someone knows, oh actually I've actually got a project That's actually might be interesting to this person and then more willing to kind of approach you if you've actually You know, mentioned that about yourself. If you don't have anything then someone will never know. And you know, most of this is about

[43:30](#) Roma Kay: Got you?

[43:32](#) Kaleem Chaudry: Connecting the Dots, Right? People don't know who you are, unless you are able to. Put you make yourself visible and similar. You don't know who else, you know, who out there is hiring. unless, you know, and and what type of people that you want to target, Unless you have an idea. So it's all about how do we connect the two

[43:57](#) Roma Kay: So clean normally in this section, do you also put anything from a personal perspective right? You know and like hey some again I haven't. I don't go in and look at people's profiles. Unfortunately, as much, maybe I should is in the who you are section as such, right. Is that is that normal or would that be kind of frowned upon?

[44:20](#) Kaleem Chaudry: No. No. You should. You should. Because at the end of day, You are an individual, right? You're a human being, right? So if you're volunteering basically, got interests that are

[44:32](#) Roma Kay: Okay.

[44:32](#) Kaleem Chaudry: Yeah, you know, you know that are, you know, like people want to know who you are as well outside of the workplace right now. Obviously, you're gonna basically put Your social kind of, you know, immediate from there, right? But it's gonna be Because effectively you know, when you get interviewed right, this is what people want to know, what, you know what, what are you outside of the workplace, right? Because then that kind of gives them an idea on how you may operate with team members and, and that inside the workplace. So I can give it, you know, I can give an example of things that I've seen on other people's profiles. If you're passionate about certain things, you know, You can, you can clearly say, and we already dedicate one line, one or two lines to that in LinkedIn. There is

[45:16](#) Roma Kay: Yeah.

[45:18](#) Kaleem Chaudry: There is a volunteering category as well. You know, some people actually specifically use the volunteering one and they put the organizations that they volunteered for charities or something. And you don't have to use, they kind of baker into your profile but yeah, you're right. The on the CV. It's kind of you don't have much space on the CV and also the

[45:38](#) Roma Kay: Okay.

[45:39](#) Kaleem Chaudry: attention isn't really there. People kind of really looking at your work experience, right? Yes. We'll have a like an interest section at the bottom. We can we can do I just kind

[45:48](#) Roma Kay: Okay.

[45:49](#) Kaleem Chaudry: of give a flavor? So yeah, it's it's useful to have that. And then on a LinkedIn, right? Because because skills is become quiet and important. I would say quite an important area where companies are really literally looking for The. evidence or what can you demonstrate and then so like you've got kind of 16 skills and And they're probably an updated, you know, someone endorsed cheaper something and go automatically added on and things like that. so what we can do is you can expand that to like 50 to 70 because

[46:34](#) Roma Kay: Okay.

[46:34](#) Kaleem Chaudry: effectively, it's just, it was that come up in searches from recruiters. so so we want to make sure we

[46:38](#) Roma Kay: Okay.

[46:41](#) Kaleem Chaudry: increase our chances of where you may land up in a potential search. So for example, if you're interested in project or project management, or program management roles, And you have a project management, but you don't have program management. Then you will not come up in that search. So, you know, we want to make sure we it's better to kind of list. This is so vast, and the thing is, it's not, they've got to drop down, but you can add your own ones, right? So there's anything typical niche, you can also add that as well. And What we will do? You actually might want to have a just a think about this as a heads up. so, The way LinkedIn basically displays the skills, it used to be a limit, it used to be a maximum 50 skills. And then now increase the 200, which means LinkedIn itself is pushing the whole skills thing. We'll choose 50 to 70 but your LinkedIn profile. Only displays the top three. So it's how you reorder as well. So, have a think about your top three skills. And which, when it comes to LinkedIn, it's easier than for us to decide that your top three. And then there's also under your bowel section, we go. We've got a top five that we can miss there as well and they can be different right? For example, if you want to be known as sales operation or you know, project management or you know, whatever we'll make you know we can put that put those there because when even someone download your LinkedIn profile as a PDF Only three your top three will display on that action. So we want to make sure that people don't you know I've had planned it. So clients who've actually listed skills and suddenly You know the last skill that you've ever updated. It goes in chronological order. So let's say you you know you learn a CRM. Your company's got a new CRM and you wanted to add that as a skill. You've added a CRM and then, guess what? That's your top skill. you know, about CRM is not yet, all right, it's actually one of your, you know, just an additional skill And then, you know, we can we can look at other aspects of your LinkedIn in terms of how do we tie everything together? But I think in terms of, All the information I need for now. That should be sufficient. Like I mentioned at the start, you'll get the notes. And you will get an email from me today. Summarizing. the key questions that I need your inputs, get that across to me

[49:20](#) Roma Kay: Okay.

[49:21](#) Kaleem Chaudry: whenever you can. and then I will start building the CV anyway and then I will share a draft with you and then We can then use, I don't have your Whatsapp. Yeah, you use Whatsapp.

[49:38](#) Roma Kay: Yes, I do.

[49:38](#) Kaleem Chaudry: yeah, if you can show me your whatsapp number, then,

[49:42](#) Roma Kay: No. Yeah.

[49:46](#) Kaleem Chaudry: I then through Whatsapp, I can basically copy paste and or you can basically hide, I can share the documents and you go through that. I

[49:51](#) Roma Kay: Okay.

[49:53](#) Kaleem Chaudry: don't. And as I say I don't mind. You know, you've got 10 changes 15, 20 changes at the end that you've got to be happy with the way you're being,

[50:00](#) Roma Kay: so,

[50:01](#) Kaleem Chaudry: know, portrayed on the scene.

[50:01](#) Roma Kay: Yeah.

[50:04](#) Kaleem Chaudry: And so then we'll basically we will only stop until you're the document is finalized. So, once we've got that,

[50:10](#) Roma Kay: Okay.

[50:14](#) Kaleem Chaudry: First version of the CV. And then, the rest of them is pretty easy to to create because you have all the base information.

[50:23](#) Roma Kay: Okay it's looking but timeline. Excuse me. What do you think? Like once I get you all the information, how long will it take you to? So that it gets updated etc.

[50:34](#) Kaleem Chaudry: Yeah, now I can basically get you the The original document. Normally I mean, I'm just prioritizing with some other clients. I've got at the moment. But I can get it pretty quickly, right? As long as I've got the information and then if there's no kind of I typically don't struggle with like, you know, I may want to double check something with you. But I can get f*** out within two.

[50:58](#) Roma Kay: Okay.

[51:00](#) Kaleem Chaudry: days of you giving me the information, right? I can not do I

[51:02](#) Roma Kay: Oh, okay.

[51:05](#) Kaleem Chaudry: can prioritize it. And as I say that will be your standard version of the CV and then the graphical one and the LinkedIn we can work on afterwards but at least you then have the the base document to use for applications and how you want to kind of test the water as well. And look, you may find that. You know, you apply, you test the water with a few agencies. And, and it's like, with anything in life, right? Anything like inside, with a sales process, you have to ad tests. Sometimes certain things you may turn around and say clean by the way. I I don't feel comfortable with this particular line. Let's change it fine. That's fine. Well we can change anything that you want, right? I think like he's always the best.

[51:43](#) Roma Kay: You got to.

[51:47](#) Kaleem Chaudry: But no, we can, I know, you know,

[51:48](#) Roma Kay: Okay, that's great.

[51:49](#) Kaleem Chaudry: you're you're quite keen to get this moving and then I can support that for you.

[51:56](#) Roma Kay: Right. So now I know you also mentioned that you part you're kind of doing recruitment on the side as well. Is that something that you would also do a session mean in the declines as well to see? Hey you know I might have someone within your

[52:08](#) Kaleem Chaudry: Yeah, on the recruitment. You know that's obviously this is obviously a paid service because this is a dedicated one-on-one, right?

[52:14](#) Roma Kay: They're good.

[52:15](#) Kaleem Chaudry: Now that I Now that I know you now that I've I know your profile. if anything comes up, that's a suitable match by default or

[52:24](#) Roma Kay: Yeah.

[52:25](#) Kaleem Chaudry: basically, you know I would other I would have that conversation with you. I'd say right? Okay. It's a particular clients skill set. So looking forward, would you be interested? And then you know, we obviously take the permission from the Canada to pull up. For that profile. So, you know, no,

[52:41](#) Roma Kay: Okay.

[52:41](#) Kaleem Chaudry: you know, like the The clients that we we sometimes get can be quite varied, right? And all different parts of the world well so you know recruitment is one of those things and opportunities about being in the right place the right time you just don't know so no but platform that perspective you know automatically your details will go in my CRM, right? And you listed as a

[53:02](#) Roma Kay: Okay.

[53:04](#) Kaleem Chaudry: what your profile is and then you know, should you know anything? Come up. I'll talk to my colleagues as well and you know that that's a given, right? And obviously that we don't you know that's not chargeable, right? That's just a given.

[53:17](#) Roma Kay: Oh yeah, okay. All right. Well that was good. A lot of things that I need to get back to you. So I want to try and get them as soon as possible because I'm out for the next few days at the end of the week. I'm just traveling and I'll be out of pocket but you're right. I would like to get this done as soon as the better.

[53:36](#) Kaleem Chaudry: Yeah, sure.

[53:36](#) Roma Kay: Because I just and I'm going to put some thoughts as well on what the kind of things that I'm envisioning.

[53:43](#) Kaleem Chaudry: Yeah.

[53:43](#) Roma Kay: That I would like, right so that that you could also put out that within as you're building the rest, you may within, you know, additional scope massage stuff. It's not

[53:53](#) Kaleem Chaudry: Exactly. And it's often a literature process because, you know, over you found this helpful in just walking through because sometimes

[54:01](#) Roma Kay: Oh yeah.

[54:02](#) Kaleem Chaudry: You know, it's it's if you a lot of typically in a lot of my clients report, this typically they don't know where to start, especially when you've got a very history of like 20 years

plus, right? And also Like with yourself, you work for one company, right? So that is is has its own challenge, and very well

[54:22](#) Roma Kay: We thought.

[54:24](#) Kaleem Chaudry: know like How do we how do we communicate the stories? You know, a lot of one of growth right. You've

[54:31](#) Roma Kay: Yeah.

[54:31](#) Kaleem Chaudry: got people who worked for 10 companies, right. And they've done different things and they're seeing they feel that their series a mess, right? They seem as a mess that they don't know. It will confuse people who ever look at the CV and they

[54:43](#) Roma Kay: Yeah.

[54:43](#) Kaleem Chaudry: don't really know where to start, right? So they're looking for that extra guidance and support so. And then now, especially with AI and people getting nervous and thinking All AI is just gonna reject my CD straight away because it's not gonna be able to put me in a certain box, but, You know, my argument against AI. You can't put humans in boxes, right, you know, it's everyone's good to

[55:03](#) Roma Kay: Yeah.

[55:04](#) Kaleem Chaudry: everyone's different even though you've got two sales operations people or two sales directly there,

[55:07](#) Roma Kay: Yeah.

[55:09](#) Kaleem Chaudry: are different people. They bring different things to the, to the table, right? So yeah, it all basically is, You know, this is a customized and a tailored approach, and the value here is in the process as opposed to the app. Obviously, the output you want. That's what you're looking for. It's how you get there, that's the valuable aspect here. I know. And I was just saying, I'll get that email out to you today. So you will

[55:38](#) Roma Kay: Okay, all right.

[55:38](#) Kaleem Chaudry: then never answer work on it. But so

[55:40](#) Roma Kay: Yeah.

[55:40](#) Kaleem Chaudry: you were saying this is a You find this valuable.

[55:45](#) Roma Kay: Absolutely because to your point is always, hey even you've been with one company for that long. Are those skills transferable in my mind, they are as in how I've been looking at. Even just the postings that have been coming up around, you know, relationship, manager, and support. There's a lot of different titles to it but then the thing that stops me all the time is and that's one thing that I don't have enough of was the the budgeting aspect of it right? Because I it's not part of my it was never mind. My boss always manage that never kind of got me into coaching me into how to manage it and things like

[56:17](#) Kaleem Chaudry: Yeah.

[56:21](#) Roma Kay: that. So that's the only piece that I feel that. I don't have that. Skilled not not the skill set as the knowledge right because I've never been exposed to it but this definitely has

got me thinking and and the more you talk more I feel like Hey there could be a few courses that I could start doing right away which are you know there I know there are there are a lot of free courses things like that as well but has got my mind percolating for sure.

[56:44](#) Kaleem Chaudry: There's a lot. Is that ultimately? You're right. You know, there is a lot of information, in fact, it's too much information available, right? And you've got to be selected, but

[56:57](#) Roma Kay: No.

[56:57](#) Kaleem Chaudry: it's what, you know, this kind of gives you an idea of what could be, what will complement your profile. that you currently don't have and,

[57:03](#) Roma Kay: Yeah.

[57:05](#) Kaleem Chaudry: know you don't want to be in a situation where you've gone for an opportunity and someone says Yeah you've got some but you're missing of this piece Well guess what? I'm already addressing yet. So you want to kind of front run any doubt or may

[57:17](#) Roma Kay: No.

[57:18](#) Kaleem Chaudry: have about your profile like yourself aware, right? You already kind of You know you're ready, familiar with like certain things that you are very, very good at and you know that there are an advantage but they're sentences you don't have well. Do you know what? Mitigate that risk mitigated by basically putting something on your profile that oh okay. You know what you've covered that angle. and so, that kind of that that we're

[57:39](#) Roma Kay: Garden.

[57:40](#) Kaleem Chaudry: that's where we had a bit of freedom with the training section, we can use that for our advantage. Excellent.

[57:45](#) Roma Kay: God can. Right, thank you very much. I appreciate it.

[57:47](#) Kaleem Chaudry: Cool. Very much. I'll be in touch soon, and

[57:51](#) Roma Kay: Yeah.

[57:51](#) Kaleem Chaudry: any questions? Give me a shout.

[57:54](#) Roma Kay: I will for sure appreciate it. Thank you. Have a good evening.

[57:54](#) Kaleem Chaudry: All right.

[57:58](#) Roma Kay: Cheers. Bye.
